

Razia Affected by Tuberculosis

Razia came to Dhaka from the village of small Basai of Barisal district before five years due to combating against poverty and employed in a garment factory. Presently she employed in a garment factory name Arrival Fashion Ltd in Mirpur 10 as quality controller position. She contributed economically in her family significantly.

Suddenly, she felt fever, physically tired in works and cough frequently in 6/7 months ago. Then one day she felt heavy fever and also informed the matter to the factory nurse. The nurse suggested her to consult with a good doctor. But undone! Meanwhile bleeding started with the cough. With afraid very much she met a doctor to BGME hospital through factory

assistance. The doctor advised to test of different blood and x-ray and the doctor found that Razia has meanwhile been affected by tuberculosis disease. She started to feed medicine upon consultation provided by the doctor and slowly she was improving with cure and she again joined at her work place. After some days of her cure, she attended in a training on health and safety in presenting with Bely group that facilitated by a facilitator from Shobujer Ovijan Foundation (SOF). Through that training she knew that different diseases might be attacked or affected by any person if dust is experiencing for a longer period.

After that training she has been using musk regularly and advise to other group members to use the same musk and express her views to others that if she knew this message before then such did not suffer this problem.
